

Intro to Web Design and Development, Class 3

CSS

Lesson Objectives

- Students can create a simple CSS file and add it to their webpage

Schedule

Part 1 - Command Line and Git Review

1. Make a new git repo, commit onion.html to it, and push to github

Part 2 - CSS

1. Syntax
2. Using Chrome developer tools
3. Exercise - Style the Onion.html document

Homework

Assignment

2. For Thursday - Read A Command Line Primer for Beginners - <http://lifelacker.com/5633909/who-needs-a-mouse-learn-to-use-the-command-line-for-almost-everything>
3. For next Tuesday - Add CSS styling to the webpage you created for the last assignment. You should use:
 - a. At least one class and one id
 - b. Change the color or background color of at least one element
 - c. Set the height or width of at least one element

Use <http://www.w3schools.com/css> as a reference
